NEXUS

**CONTOUR & SHARPEN
ALL-IN-ONE!**

**The first of its kind to offer
PRECISION LASER SCANNING,
CONTOURING & SHARPENING
in ONE fully automated machine.**

NEXUS stands out from the rest:

Contour & Sharpen in one machine!
Large Digital Touchscreen Display
Roster/Client List Embedded
Ultra Quiet Remote Exhaust*
Fully Customizable

Specifications:

Dimensions: 42"W x 32"H x 32"Deep

Weight: 1100 lbs Supply: 110V

**IT'S TIME.
ARE YOU READY FOR IT?**

*Sold separately

CONTOURING & SHARPENING

Employs traditional 8" grinding wheels that guarantee superior mirror finish. Build your own contours and adjust hollows on the fly. Supports competitor's rockers, allowing you to accommodate any player contour/profile preference.

LARGE TOUCHSCREEN DISPLAY

A high resolution touchscreen allows you to access information with ease. An on-boarded roster card of patrons or players ensures quick access to valuable data.

REMOTE EXHAUST*

The ultra quiet remote exhaust is easy to maintain and can be located almost anywhere, keeping your environment clean and clear for operators. The neoprene top also provides an extra work space.

* Sold separately.

PLA5VSV

TRIPLE STATION SKATE SHARPENER

Dimensions: H: 54" W: 30.5" L: 665" (with dual sweep trays - 71") Weight: 1,110 lbs
20A, 220V, single phase, 4-wire supply - 2X 110V lines
1 common line & 1 ground line

FULLY CUSTOMIZABLE

Simple to use as well as to maintain, the PLA5VSV Blademaster Skate Sharpener is designed for intensive professional use and promises precise and optimal sharpening every time!

Unit features 2 finishing stations & 1 direct drive cross grind station.

Custom color and decals can be applied at request for additional cost.

Contact Customer Service today to discuss your new machine!

CAN: 1-888-648-7776 US: 1-800-878-4648.

Not in North America? No problem!

We also have authorized distributors around the world.

APEX HOOD VENTILATION SYSTEM

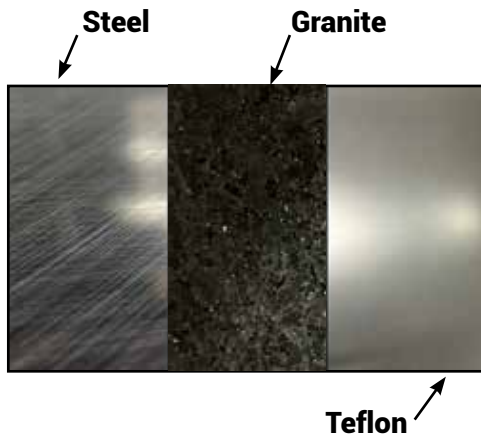

- Available for all 3 station machines
- Available in custom colors and logos
- Hi-intensity LED lighting
- Hi-fi Audio system included
- Retractable Lexan™ shields

PLA5VSV STANDARD FEATURES:

VARIABLE SPEED DIAL

Dual variable speed finishing heads ensure optimal cutting action and a perfect finish on the blade. Maintain consistent grinding action throughout the life of the wheel and optimize grinding wheel life. Use your wheels right down to the blotter, without sacrificing performance.

LARGEST WORK SURFACE IN THE INDUSTRY

Available in granite, steel or teflon-coated.

5TH GENERATION EXHAUST SYSTEM

Includes a redesigned impeller dramatically improving suction - noise levels have been cut in half compared to what was already the quietest system on the market.

BUILT TO ACCEPT THE CRM6 MARKVI CUSTOM RADIUS SYSTEM

Accepts the Mark 6 or Mark 5 Custom Radius System.

LED LIGHT FIXTURE

Installed in the front of the hood and Lexan™ windows in the top help illuminate the sharpening operation.

CABINET STORAGE

Includes additional shelving for storage of accessories and commonly used tools.

STANDARD REAR ACCESS PANELS & DUAL SWEEP TRAYS

GRIT BUCKET & CARTRIDGE FILTER DESIGN

High-capacity grit bucket and cartridge filter design virtually eliminates the possibility for installation errors and simplifies routine maintenance.

PURCHASE INCLUDES

Also includes built-in cross grind dresser, low profile casters, scratch resistant Lexan™ shield, service filter indicator light, keyed lockout, safety glasses, Blademaster banner, sweep tray & vacuum hose.

THE CHOICE OF PROFESSIONALS!

LEGEND

Dimensions: H: 53" W: 27.5" L: 40.5" (with sweep tray - 46.5")

Weight: 1,110 lbs

20A, 220V, single phase, 4-wire supply - 2X 110V lines

1 common line & 1 ground line

BRLEG1FSF

It's legendary! A 3 station machine with 2 finishing stations & 1 direct drive cross grind station designed for intensive professional use and promises precise and optimal sharpening every time!

The Legend has a smaller footprint than our angled machines, making it ideal for busy locations where floor space is at a premium.

Front feed system with integrated dual mounted radius arms with hardened steel pivot points for precise, long lasting wheel dressing.

Built to accept our Blademaster CRM5 / CRM6 contouring systems.

Use with Blademaster precision diamonds to guarantee the correct radius every time.

Features an Industrial Grade Exhaust system.

Custom color and decals can be applied at request for additional cost.

INFINITY

BRINFFS

The Blademaster INFINITY is a 2 station machine with 1 finishing station & 1 direct drive cross-grind station.

20% smaller foot print than the LEGEND (BRLEG1FSF) machine, making it an excellent choice where space is a premium.

The INFINITY features a front feed system with an integrated dual mounted radius arm with hardened steel pivot points for precise, long lasting wheel dressing. There are no single arm cams or bearings to wear or loosen.

The direct-drive cross-grind station is designed for contouring with the CRM6 system.

Built to accept new generation Mark6 Custom Radius System.

Includes low profile casters, scratch resistant Lexan™ shield, 1 pair safety glasses, Blademaster banner, service filter indicator light, sweep tray & vacuum hose.

Note: For all tabletop sharpening machines, 3" detail station heads may be substituted for any of the standard 8" finishing heads.

Dimensions: H: 52" W: 27.5" L: 40.5" (with sweep tray - 46.5")

Weight: 720 lbs

20A, 220V, single phase, 4-wire supply

CONTOURING MACHINE

GENX

The Blademaster GENX - Our 1st Generation Manual Contouring Machine. It is operator friendly & easy to use - simply load & unload blades using our QC100 quick clamp. With its small footprint, it is an excellent choice for all shops & locations.

Features:

- Built in 3/4 HP exhaust system
- Safety guards to protect the operator
- Lighted hood for improved vision
- Compatible with your current CRM6 bars
- Power supply - 110V, 1ph, 60Hz, 30A
- Dimensions - D: 30" x W: 38" x H: 50"
- Weight - 450 lbs

MACHINE COMES COMPLETE WITH:

- Setup gauge for determining blade center for mounting into skate holder
- 2 x QC100 quick clamp (allowing you to have one set in the machine and another ready to go)
- 10 comparative gauges to verify your contour is true
- 10 common bars (PRO PACK) consisting of 10, 11, 12, 13 and 30 ft as well as CAG one 35-65 / Elite SCS2LG / ME 981 / Pro Sharp Win1 and Quad2

* Custom bars available per request *

CUSTOM RADIUS CONTOURING SYSTEM

MARKVI CUSTOM CONTOURS

If hockey was only a game of speed, a very long single contour would enhance speed. But then it would be called speed skating.

If hockey was only a game of turns and pivots, a very short single contour would enhance agility. But then it would be called figure skating.

Hockey requires the best of both - and **Blademaster's Custom Radius Mark 6 System** can achieve this!

Contouring the skate blade enables the player to better realize their full skating potential.

Talk to your local Blademaster Custom Radius specialist for more information on the revolutionary new **Mark 6 System**, or visit www.blademaster.com.

WHAT IF YOU COULD

Cover an extra 2 feet when crossing the neutral zone?*

Take corners at least 5% faster?*

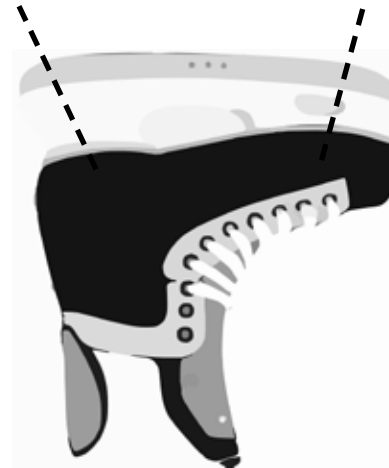

Shave 0.3 seconds off your time in a 110m performance test?*

*Average results for players after having their skates contoured.

BRCEX1

The BRCEX1 Combination Finishing & Cross Grind Station is perfect for smaller operations that still want to offer complete skate sharpening services, including contouring.

It has a convenient front feed system, built-in exhaust system and comes complete with:

- an 8VBP premium 8" grinding wheel
- diamond dresser
- tommy bar
- wheel wrench
- safety glasses
- sweep tray, vacuum hose and low profile casters
- support for optional CRM6 Custom Radius Contouring System
- Teflon coated table-top.

Head pivots between cross-grind & finishing positions.

REMOTE EXHAUST

Floor Dimensions: H: 79", W: 47", L: 41"

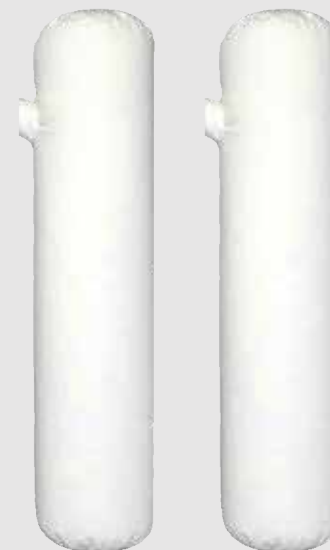

RE1

The RE1 Remote Exhaust offers a significant reduction in the noise level at the sharpening station compared to a conventional self-contained machine exhaust.

The RE1 is situated in a remote location - away from the sharpening machine and repair / service center. Heavy grit and dirty filters are kept away from the machine's operator(s).

The system is virtually maintenance free. Empty the heavy grit far less often (monthly) and rarely clean / change the filter (annually) depending on usage.

It's robust design will work with 2 triple-head machines or any combination of six (6) Blademaster heads (cross grind and / or finishing).

11502 Replacement filter bag for RE1. Package of 1 (Requires 2).

RE4

Designed with Equipment Staff in mind, our newly redesigned RE4 PORTABLE EXHAUST boasts a new modular design and a robust Platinum exhaust assembly - keeping you and your team healthy while you give your players THE edge.

Features:

- 350 CFM, self-sealing blower system - common to PLA5 machines - featuring a high efficiency fire retardant filter (99.8% efficiency @ 0.5 micron)
- New modular design - a magnetic and reversible scoop design rotates around to accommodate JAN-AL portable cases
- Extended grit opening to the rear of the table for ease of maintenance
- Rubber mat rotates to properly cover and seal tabletop opening
- Fully hinge & collapsible larger working surface to right side of the table
- Durable rubber work surface - 34-1/2" from floor
- Clean/dirty filter indicator lights, cleaning timer and switches located on both sides of the machine
- Bendable work light
- Power supply requirements: 115V/60Hz/1PH/8A
- Includes 8 ft cord and plug
- Heavy duty locking casters

SKATE & GLOVE DRYERS

SC7600

The Blademaster Portable Series Skate & Glove Dryer dries up to 6 pairs of skates or gloves.

The unit has been redesigned for more heat and higher blower output than previous models. It features adjustable stainless steel arms & hangers.

Comes in its own durable travel case with pullout handle and travel wheels.

H-30½", W-19", L-15¾". Weight 68 lbs.

SC8500

The Blademaster Professional Series Skate & Glove Dryer dries up to 12 pairs of skates or gloves in approximately 5 minutes!

The unit features adjustable stainless steel arms & hangers. Has heavy duty casters for easy movement & a high temp safety switch.

FORM DRESSING & DIAMOND ROLLS

Special rolls available upon request.

DOWNLOAD OUR FORM
DRESSING REFERENCE CHART.

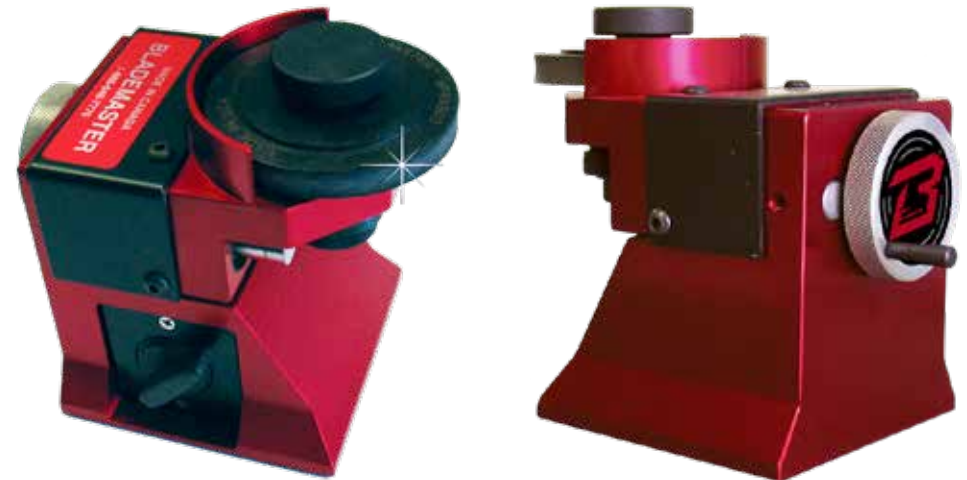

THE BLADEMASTER ADVANTAGE

Precision CNC machined and plated with natural diamonds so that the shape of the roll never changes. You get a consistent dress every time.

Largest diameter dressing roll on the market. A larger diameter takes longer to reach the speed of the grinding wheel and prevents stone crushing.

A larger roll means more diamonds which gives you more dresses per roll. This equates to longer roll life and reduced dressing cost.

MPFD300

Blademaster's precision form dressing system is designed for use with any skate sharpening machine. It is independent of the finishing head, which gives a consistent dressing height from wheel to wheel and machine to machine. This feature greatly reduces the need for holder height adjustment.

PORTABLE MACHINES

BRPPR06

SH8000 (sold separately)

SH8800 (sold separately)

The BRPPR06 uses our new variable speed motor that features a smaller frame, allowing the operator to use more of the wheel before replacing it (saving you dollars).

This new-and-improved variable speed motor is designed for operating in temperatures down to -40°C in comparison to the BRPPR02 (-20°C).

New robust PR06 motor - a 3/4 hp compared to its predecessor, the 2/3 hp PR04 motor.

Includes a new feed system that pushes at the center of the rear yoke bar to eliminate crabbing.

Power supply requirements: 110V, 60Hz supply (runs approx 3.1A)

Please note: Skate holder sold separately.

XFCP - Portable C Kit for all Blademaster Portable Skate Sharpeners

- 1 8MXRUBY finishing wheel
- 1 BR100 skate gauge
- 1 pack of 4 honing stones
- 1 bottle of Slick-it
- 1 replacement diamond
- 1 Blademaster towel
- 1 Blademaster apron, Gusto Glide and grit removal brush

QUICK CLAMP

QC100

SIMPLE TO USE

Just squeeze the bottom together to insert a steel blade.

CLAMP SYSTEM

Spring tension alone will securely hold the blade, but thumb screw exists as well for added security.

DUAL PURPOSE TOOL

Can be used for both single blade sharpening and contouring of two blades at once (stacked configuration).

OPERATOR PROTECTION

The clamp features a 9ft radius that provides a safe path of travel during the deburring process.

PROVIDES 3RD HAND

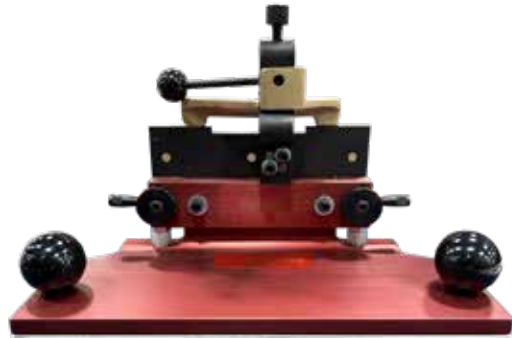

Simply set the clamp on its back, then with one hand squeeze the clamp to install 2 blades and use your other hand to align them in the QC100.

INGENUITY PERFORMANCE
PRECISION INNOVATION
CONVENIENCE EVOLUTION

THE BLADEMASTER QUICK CLAMP USES A SINGLE THUMB SCREW VERSUS MORE CUMBERSOME 2 SCREW DESIGNS.

PRECISION SKATE HOLDERS

SH2000

SH6000

SH6500

SH6600

SH6002 ELITE SERIES UPGRADE KIT

Complete kit to swap your existing SH6000 or SH8000 holder with the improved anvil and post from the SH6600/SH8800 Elite holders.

GENERAL PURPOSE

SH2000

Entry level "Ultra Glide" skate holder can be used on most skate types. Traditional cam handles provide height adjustment.

SH6000

Professional skate holder that originated dial-increment adjustment. Allows for precise three-dimensional adjustment.

SH6500

Ideal for Figure Skates, the SH6500 holds side honed figure blades in the holder by clamping the blade by the stanchions, ensuring square edges. The aluminum clamp and anvil provide mar-free clamping.

SH6600

Elite Series General Purpose Skate Holder is the same as SH6000, but with an extended-length anvil providing added support for blade-only sharpening. Also includes a modified clamp post with extra runner clearance to accommodate changing skate designs.

SH6302 POWERFLY UPGRADE KIT

Complete kit to swap your existing SH6XXX or SH7XXX holder with the improved anvil and post from the SH6300 Powerfly holder.

PRECISION SKATE HOLDERS

SPECIAL PURPOSE

SH6300 POWERFLY Ti

Forget about popping out your steel! The PF Holder has been specifically designed for those cowlings with crossbars.

SH7000

Ideal for Goalie Skates, the SH7000 is an excellent all around holder and has a wide stirrup to accommodate skates that will not fit over a traditional clamp post.

SH7700

Ideal for Child Skates, the SH7700 multi-purpose holder has a smaller anvil to support shorter skates that will not fit over a traditional clamp post.

SH8000

Portable and lightweight professional skate holder, ideal for traveling teams where size and weight are a concern.

SH8800

Same as SH8000 but with an extended-length anvil providing added support for blade-only sharpening. Also includes a modified clamp post with extra runner clearance to accommodate changing skate designs.

GAUGING ACCESSORIES

BR1000

The BR1000 is an integrated in-process squareness gauge.

The patented squareness gauge is a fast and accurate way for the operator to tell if the edges of the blade are ground square **WITHOUT** taking the skate out of the holder!

The tool is secured to the holder with a magnet and the magnetic angle is set on the blade close to the face of the squareness edge. This gives the operator a visual reading of how square the two outside edges are in relationship to the side of the blade and adjustments can be made without removing the skate from the holder.

BR100

The Pro-Square is a fast and accurate way for the operator to tell if the edges of the blade are ground square.

The tool is secured to the blade with a nylon thumbscrew & the magnetic angle is set on the blade close to the face of the Pro-Square. This gives the operator a visual reading of how square the two outside edges are in relationship to the side of the blade.

BHC2005

Engineered to ensure square edges by comparing the center line of the grinding wheel to the center of the blade. Magnetizes on top and bottom.

GRINDING WHEELS

8NLP - Unprecedented on the market, a wheel composed of blended Vitrified bond that features excellent edge retention and cool cutting.

8AXW - 8" Vitrified bond, features a medium grit for longer lasting edge retention. Cool cutting, protecting your steel from burning. Requires less dressing.

8VBP - The best edge retention in the industry. Maintains radius/shape longer than any other wheel, saving you money. Unsurpassed finish translates to a superior quality sharpening.

8GC - Exceptional wheel for holding form - requires fewer dresses between sharpenings. Cool cutting action.

8AS - High performance aerospace grade grinds cool and is optimal for edge retention.

08RUBY - Open structured wheel for quick and cool cutting action. Ruby abrasive with a high chromium content.

88R - Uniform grit and closed structure for a superior finish for recreational and figure skates and goalie skates.

8MXRUBY - Premium ruby abrasive with a high chromium content. Well suited to both carbon and stainless steel blades. Multi-grit.

8MXR - All-purpose multi-grit nitride grained wheel that is suitable for a wide variety of skate blades.

The Blademaster Advantage

Blademaster diamond dressers are made from the highest quality industrial diamonds on the market. All diamonds are made in North America and set to our exacting standards for concentricity and shank length. A precise radius on the grinding wheel every time minimizes the need for holder adjustments.

TSM687

Standard single point diamond dresser,
1/15 carat diamond.

TSM688

TSE266	#66	0.480	1.219

EYELET WASHERS - TSE2EW - ALUMINUM EYELET WASHER (200/PKG)

*Two TSE2EW washers are required for each eyelet - one on the top and one on the inside.

BOOT EXPANDER TOOLS

BE02111: Boot Expander with Accessories. This mini hydraulic pump is a versatile tool that stretches length as well as width, works well for inline and ice skates.

BE02106: Extensions (small, medium, large)

BE02107: Micro Toe Adjuster

BE02108: Set of Toe Pieces

BE02109: Set of Five Buttons

BE02110: Boot Expander Pump with Hose Assembly

BE02106115: Rings for Extensions (Set of 5)

WALKER PRESS

BE02400: Walker Press with Accessories. Easy to use tool allows you to customize all types of footwear. Designed to get into hard to reach spots and works with or without our Boot Expander.

BE02145: Walker Press Attachments

BE02150: Small Heel Block with Buttons. Widen heel area & eliminate the need to bind & weaken the boot, also maintains the heel shape when stretching for length

1. **BE02301:** X-Large Forefoot Expander; Offers 3-dimensional expansion of forefoot when used in conjunction with the boot expander.

2. **BE02295:** Medium Forefoot Expander See above description.

3. **BE02290:** Small Forefoot Expander. See above description.

4. **BE02285:** Extra Small Forefoot Expander. Can be used to work on the toe box of hockey skates, shoes, and small ski boots.

THIRD HAND

BE02200: Holds 2 boot expanders, and has a handy place to store accessories. Bolts directly to your workbench so you can easily work on two boots at once. Keeps bench clean for maximum efficiency. (Tools not included).

ACCESSORIES

BE02120: Boot expander without Hose. Designed to work with the Walker Press & for those times when you don't need the length of the hose.

BE02125: Forefoot wedge: Prevents top of boot from collapsing during stretching.

BE02130: Large Heel Block: Widens heel area, eliminates need to grind & weaken boot.

BE02135: Micro Toe Expander. Precisely stretch problem toe areas.

BE02302: Set of 3 block sole supports to give you that extra angle when stretching.

SKATE SERVICE & MAINTENANCE

SC1500: Deluxe Work Bench and Shelving Unit. Durable rubber work surface. Ergonomically designed for user comfort and productivity.

SC1500SF: Bench Only

SC1502A: Assembled top shelf assembly

SC2300: Boot Warming Oven Cart

SC2400: Boot Stretcher, includes 3 sets of lasts: mens, womens and childrens.

SC2800: Boot Warming Oven complete with digital temperature controller, timer on/off switch and large enough to work with ski boots.

SC2400

SC2300

SC2800

SC2100

- Custom Service Centre features all the tools needed for custom skate work on hockey & figure skates
- Heavy duty metal construction with durable rubber working surface is ergonomically designed for user comfort & productivity
